From: Former Student at Pascal Academy

Dear Jalil,

I would like to extend my sincerest gratitude towards your gracious efforts in teaching and molding me during the time I spent as your student. It is because of your efforts I am the citizen that I am today. It is also thanks to you that I have succeeded in the financial industry. Without your vigorous mathematic curriculum, I would not have excelled in university. The teaching at Pascal Academy gave me a strong foundation in mathematics which enabled a smooth transition into the high mathematical standards of university. I learned Calculus and Advanced Functions at Pascal Academy which gave me strong foundations for university course like; Advanced Calculus for Financial Modelling, Econometrics, Linear Algebra, Finite Mathematic, Corporate Finance, Managerial Economics and even some Computer Science courses. I have now since graduated from the University of Western Ontario now called Western University with a bachelor's degree with honours. I now work on Bay Street in Toronto in the financial industry.

Once Again, I would like to express my gratitude for your teaching, mentorship, and for bringing out the best in me. Not only did you educate me at a standard higher than the normal education system, you mentored me to become a better person. This, which I will always be grateful for is why I am so delighted to mention that Jalil Hajimir was and will forever be my teacher and mentor.

Sincerely,

Former Pascal Academy Student
